LiftEurop, the Luxembourg-based manufacturer of lifting accessories, has launched an online traceability and management tool called LifTracer.

With traceability becoming “more and more important” in order to prove that products meet certain industry standards or comply with industry regulations, the new tool not only allows the traceability of LiftEurop’s lifting accessories but also gives access to all product-related documents, such as certificates of conformity, as well as instruction manuals, technical data sheets, product videos and so on.

All LiftEurop products produced from 2021 till today are on the database.

The company has also developed this tool to limit the printing of documents that, according to Europe’s Machinery Directive 2006/42/EC, must accompany the products. **LifTracer** facilitates the whole process of filing and archiving and avoids the loss of documents, while LiftEurop is also meeting the packaging reduction requirements of the European Directive 2018/852.

Founded in 2010 and located in Wiltz, LiftEurop produces and distributes lifting equipment and accessories, and is integrated into the lifting division of Alipa Group, a Luxembourg specialist in industrial packaging and lifting.
